

Tommy Marshall

GRC Analyst | Security Risk, Compliance and IAM Governance

Atlanta, GA | [\(404\) 661-9425](tel:(404)661-9425) | tommymarshallgrc@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

GRC and cybersecurity practitioner with nearly a decade of operations and logistics leadership in high-volume, compliance-sensitive environments. Combines experience in operational risk, process accountability, incident escalation, documentation, third-party coordination and continuous improvement with applied portfolio work in risk assessment, control mapping, policy development, IAM governance, audit evidence and remediation planning. Applies NIST RMF, NIST SP 800-53, NIST AI RMF and ISO/IEC 27001 concepts to realistic hybrid, cloud, mobile and vendor environments.

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

CompTIA Security+ (in progress) | **AWS Certified Cloud Practitioner** (in progress) | **Certified GRC Engineer-Auditor CGE-AUD** (in progress)

AREAS OF EXPERTISE

- **Frameworks and Standards:** NIST RMF, NIST CSF, NIST SP 800-53 Rev. 5, NIST AI RMF, ISO/IEC 27001 concepts and FedRAMP concepts
- **Risk and Compliance:** risk assessments, risk registers, control mapping, gap assessments, audit evidence, control testing, policies, procedures, POA&Ms and continuous monitoring
- **Identity and Access Governance:** IAM, RBAC, least privilege, MFA, access reviews, segregation of duties, account lifecycle governance and conditional access concepts
- **Documentation and Tools:** GitHub, Markdown, Mermaid, Microsoft 365, Excel, Google Workspace, process mapping, data flows, executive reporting, AWS and Azure fundamentals

KEY ACHIEVEMENTS

- **GRC Portfolio:** built four self-directed case studies covering security risk, control operationalization, AI governance and cloud security operations
- **Enterprise Risk and IAM:** scoped a simulated program for a 225-employee logistics company spanning Microsoft 365, SaaS, on-premises systems, mobile devices, contractors and regulated data
- **AI Governance:** produced a 38-file repository applying the NIST AI RMF to impact assessment, risk management, oversight, vendor risk, monitoring and incident response
- **Operational Performance:** sustained 98% on-time delivery while reducing turnaround time 15% and operating costs 12% through workflow standardization, route optimization and performance monitoring

SELECTED GRC PROJECTS

[The Human Side of Security](#) | Human-Centered Security Program

Assessed a fictional 225-employee logistics enterprise; developed risk, IAM/RBAC, awareness, incident-response, control-testing, KPI/KRI and executive-reporting artifacts across hybrid systems and third parties.

[AI Governance and Risk Assessment](#)

Applied the NIST AI RMF across an AI use-case inventory, impact assessment, risk register, RACI, controls, human oversight, monitoring, incident response, vendor risk, evidence testing and POA&M.

[From Framework to Workflow](#) | Security Control Operationalization

Translated framework requirements into control narratives, ownership, operating procedures, testing steps, evidence requirements, gap analysis, remediation tracking and measurable performance indicators.

[Cloud Security Operations Blueprint](#)

Designed governance documentation connecting cloud policies and controls to IAM, incident escalation, evidence collection, continuous monitoring, technical teams and business risk priorities.

LEADERSHIP AND PROFESSIONAL INVOLVEMENT

Director of Events, GRC Engineering Club Atlanta Chapter | Atlanta, GA | 2026-Present

- Collaborate with chapter leadership to plan virtual learning sessions, professional-development activities and future monthly in-person events for aspiring and transitioning GRC professionals.
- Helped design a four-phase learning roadmap covering business context, risk, control mapping, evidence, remediation, continuous monitoring and portfolio development.

PROFESSIONAL EXPERIENCE

AI Trainer and Quality Evaluator, TELUS International AI Acquisitions | Remote | April 2023-December 2025

- Evaluated webpages, digital content and AI-generated outputs for accuracy, relevance, quality, user experience and compliance with defined evaluation standards.
- Applied detailed guidelines consistently, maintained confidential electronic records and documented inconsistencies supporting quality measurement and process improvement.

Logistics and Operations Manager, Solidarity Analytics and Media | January 2023-January 2025

- Directed multi-city logistics, scheduling, routing, documentation and escalation, sustaining 98% on-time delivery in a deadline-driven environment.
- Reduced turnaround time 15% and operating costs 12% through workflow standardization, route optimization, performance monitoring and corrective action.
- Maintained operational records, tracked performance indicators, coordinated stakeholders and resolved exceptions affecting schedules and business continuity.

Director of Logistics, David August Inc. | November 2021-January 2023

- Directed logistics involving personnel, schedules, vendors, inventory movement, shipment documentation and service requirements.
- Strengthened accountability across transportation and fulfillment activities while resolving shipment discrepancies and reducing operational disruption.

Transportation Manager, Alpert and Alpert Iron and Metal Inc. | September 2018-September 2021

- Managed transportation operations, driver assignments, routing, vehicle readiness, equipment utilization, shipment staging and daily dispatch requirements.
- Maintained transportation, inventory, shipment, safety and chain-of-custody documentation supporting compliance and operational accountability.
- Monitored driver, schedule, equipment and documentation exceptions; coordinated corrective actions and escalations to reduce service, safety and operational risk.

Independent Contractor, Lyft, Metrobi, GoShare and Wingz | Atlanta, GA | January 2024-Present

- Coordinate time-sensitive transportation and delivery assignments using digital platforms, routing tools, real-time customer communication and accurate service records.
- Identify and resolve routing, scheduling, documentation and service exceptions; escalate issues to protect service quality and operational continuity.

EDUCATION

DeVry University | Undergraduate Coursework, Computer Information Systems | 2003
